

**MAIN FEATURES**

Complete group made of load cell and electronic weight indicator, mainly used in laboratory tests.

- Display indications: weight (6 digit)
- Tare zero and weight settings.
- Measuring units selection (kg – t - N – kN).
- Automatic power-off when rising above the range
- Digital filter selection.
- Peak function (it visualizes and hold the maximum weight).
- Automatic transmission via RS232 of the measured weight .
- Selection of the automatic auto-zero at power-on

- Accuracy:  $\pm 0,1\%$  fondo scala
- Working temperature:  $-5 \div +55$  °C
- Power supply: batteria NiCd 7,2V
- Battery life: 20 h
- Load cell safe load limit: 200% fondo scala
- Breaking load coefficient:  $> 5$
- Protection: IP55 EN 60529
